OBJECTIVE

Proficient in React.js and JavaScript with 4 years of experience, adept at developing and maintaining responsive web applications for publishing and real estate-based projects. Skilled in component-based architecture, state management, API integration, and crafting intuitive user interfaces through meticulous attention to detail.

EXPERIENCE

JULY 2022- MAY 2024

TNQ Tech Pvt Ltd: Software Engineer (Front-End Developer)
Project: Proof Central
Domain: Publishing Company
Project Description: A publishing Company developing HTML-first, Cloud-enabled, browser-based products for content production workflows including peer review, proofing, copyediting, and pagination. A product named Proof Central helped users with online proofing technology and also made the process of proofing faster by using React's component-based architecture to facilitate modular development.
Responsibilities:

- Utilized strong React skills to build SPAs, responsive user interfaces, and interactive components, enhancing the overall user experience.
- Contributed to Scrum methodology by actively participating in sprint planning, daily stand-ups, sprint reviews, and retrospectives to ensure timely and efficient project delivery.
- Implemented deployment activities by coordinating with DevOps teams to deploy code changes to production environments.
- Contributed to performing in a fast-paced environment, maintained existing codebase, conducted end-to-end testing, and deployed unit testing.

NOV 2021- JULY 2022

HCL Technologies: Software Engineer (Front-end Developer)
Domain: IT Training and services
Responsibilities:

- Attended Training on React, Node.js, Nest.js, and MySQL.
- Worked on hands-on projects like Shopping website, Library manager, and Pet-Peer using Nest.js and MySQL.

EDUCATION

M.TECH

NIT Jamshedpur
CGPA - 8.85

B.TECH

SIET Allahabad
Percentage – 76%

KEY SKILLS

- WEB DEVELOPMENT
- REACT JS
- REDUX TOOLKIT
- JAVASCRIPT
- TYPESCRIPT
- CSS/CSS3
- HTML/HTML5
- BOOTSTRAP
- TAILWIND
- SHELL SCRIPT
- MYSQL(BASIC)
- DOCKER
- GIT/GITHUB
- JEST
- AGILE METHODOLOGY

- Worked on projects based on React, Node.js, and Nest.js technologies.
- Prepared technical design or documentation to facilitate knowledge sharing, set up monitoring, deployment pipelines, pair programming, and project continuity.
- Contributed to Scrum methodology by actively participating in sprint planning, daily stand-ups, sprint reviews, and retrospectives to ensure timely and efficient project delivery.

AUG 2021- OCT 2021

Settlin: Project Intern (React)
Domain: Real Estate Company
Project Description: A property listing and buying website, facilitating seamless property search and purchase through intuitive interfaces and advanced search functionality.
Responsibilities:
- Used React to create dynamic high-performance interfaces for property listings, optimized state management for seamless user interactions, and integrated with backend systems for real-time data updates enhancing overall user experience and operational efficiency.
- Worked closely with senior developers on project management and coding skills.
- Worked on UI design to maintain a consistent website look and theme.

JUNE 2019- SEPT 2020

CIPL: Management Trainee (React)
Domain: A pipeline company (ONGC)
Project Description: An internal website that allows the planning team to allocate and monitor manpower and machines to sites in the Pipeline project as per client (ONGC) requirements.
Responsibilities:
- Designed, developed, and delivered websites focusing on client requirements.
- Collaborated closely with other team members to plan, design, and develop robust solutions.
- Integrated web services and maintained previously developed modules.
- Stay updated with new technologies and versions, and apply this knowledge to improve development processes and product quality.
